Company Summary

Skynet Security Systems is a UAE incorporated company founded in 2015 with an objective to offer all market segments reliable Safety & Security systems and solutions.

Skynet Security Systems is run by industry veterans bringing their experience and international partnerships, thereby providing you with the best results through adaptive solutions and highly responsive service standards. We have a strong team of professionals with a dedication to excellence in installations and support services. Our software and hardware engineers are working in tandem with seasoned project managers and technicians to deliver cost-effective and comprehensive setups at all times.

Mission

To be market leader in Security Systems and to be the preferred Integrator for security systems.

Vision

To grow as Security Systems leader by adapting to a constantly evolving environment with a promise and a commitment to deliver quality solutions that will exceed client's expectations.

Value

Skynet Security Systems believes in developing strong and successful relationships with its customers. We are driven by customer needs, adhere to the highest quality standards, conduct ourselves with highest ethical and moral standards and commit ourselves to understand our customers and work towards a mutually beneficial relationship

OUR MAIN PRODUCT CATEGORIES

CCTV

We provides a full range of digital as well as IP solutions for camera surveillance and security monitoring that range through all global manufacturers. We also provide ANPR/ENPR cameras as required by local authorities.

Access Control

Whether the need is for a basic proximity card or a biometric based system, gate barriers, bollards, speed lanes, turnstiles, magnetic locks, or multiple site management systems, we have the most comprehensive range of access control solutions

Intruder Alarm & Police Connection

Skynet Security Systems offers both wired and wireless alarm systems from global leaders. Sensors include door and shutter contacts, movement and glass break detectors, vibration and seismic sensors, kick bars, duress buttons, and heat detectors. Alarms are in the form of a siren, or silent with the optional police connectivity that will alert the police control officers of any intrusive attempt to gain unauthorized access to a secured facility.

Home Automation

As smart homes in the UAE increase on an ever larger scale, home and building automation designs take on a whole new dimension, challenging you to consider a growing list of requirements. At Skynet Security Systems, we are ready to assist you with our expertise, paired with our portfolio of high-quality components for home automation technology.

Fire Detection & Alarm Systems

Conventional and intelligent analogue addressable fire detection & alarm systems.

Fire Suppression Systems

All gas based suppression systems such as CO₂, FM200, Inergen and Argon, foam and wet chemical suppression systems.

Water Based Fire Fighting Systems

Automatic sprinkler systems, water spray systems, hose reels and risers.

Hand Held Fire Fighting Equipment

CO₂, dry powder, foam, water and Inert gas based fire extinguishers.
